

JOSÉ GUERRA

Full Stack Developer | Laravel • Livewire • Vue.js • Node.js

Tel: +58 412 784 56 24 | Email: jose1894@gmail.com | Valencia, Carabobo, Venezuela

LinkedIn: linkedin.com/in/jose-guerra-21807651

Professional Summary

Full Stack Developer with more than 5 years of experience managing the entire life cycle of scalable and robust web projects. Skilled in backend development with **Laravel** and **CodeIgniter**, and frontend interfaces using **Vue.js** and **Livewire**. Strong background in RESTful API design, data modeling, and server management (VPS, NGINX, Docker). Proven ability to deliver efficient, high-performance solutions from concept to deployment.

Experience

Sentientinfo

April 2024 – May 2025

Full Stack Developer / Mexico

- Developed and maintained high-impact web projects applying Full Stack methodologies, focusing on backend optimization and business logic.
- Built a chatbot subscription management system in CodeIgniter, ensuring operational continuity and efficient user handling.
- Led Laravel + Livewire projects such as a survey-administration platform with a modern UI and a large-scale backend for complex data modeling and RESTful API integration.

Freelance / Independent Professional

November 2019 – December 2024

Full Stack Web Developer / Lima, Peru

- Designed and implemented modular billing and inventory systems improving SME operational efficiency.
- Led four e-commerce projects (*todoenroca.com*, *euroricambiodiesel.com*, *promarketlatino.com*, *vida-loestodo.com*) using Laravel, CodeIgniter, Vue.js, HTML, CSS and JavaScript.
- Managed DevOps setup: VPS configuration, NGINX optimization, MySQL tuning, Docker micro-services, and Git/GitHub CI.

Papora

October 2021 – July 2023

Frontend Developer (Part-time)

- Created interactive UI components for a high-traffic language-learning platform.
- Converted Figma mockups into functional, responsive code ensuring design fidelity.
- Core technologies: HTML5, CSS3, JavaScript (Vanilla JS).

Novoples C.A.

September 2015 – January 2018

Full Stack Developer / Valencia, Venezuela

- Developed and maintained modules for the Liit System (Argentina), providing enhancements and bug fixes.

Freelancer (Projects in Venezuela)

August 2014 – January 2018

PHP Web Developer

- Built web systems for public institutions, including:
 - Incident management for Valencia's Fire Department.
 - Request management for the Municipal Environment Institute (IMA).
- Stack: PHP, MySQL, HTML, CSS, JavaScript, AJAX, JSON, jQuery.

PGFA, Perales, Pistone & Asociados

March 2015 – September 2015
